

## **Baiting Tips**

Just like people, rodents can have different tastes and preferences. We've found that ordinary dry pet food is an effective lure for rodents. If you want to try something different as a lure, here is a brief list of some of our staff and customer favorites:

Dry Nuts

Trail Mix

Oatmeal Cookie Morsel

Candy Corn

Peanut Butter and/or Chocolate placed in a plastic bottle cap

Ritz Bitz with Peanut Butter

Sweet Feed

Chicken Scratch

Goldfish Crackers

**ANYTHING** goeey, oily, or salted should first be place in a plastic bottle cap or you could end up with a mess, or compromise the electronic sensing components. Salted nuts and seeds can cause corrosion to the plates in the bottom of your unit.

**Don't be afraid to experiment; if the rodents turn their noses up try something else. Observe what they've been attracted to in your home or yard.**
